Management's Discussion of Fund Performance

SUMMARY OF RESULTS

Over the past year, the First Trust Multi-Strategy Fund (or the “Fund”) remained steadfast in its dual mandate of delivering a low-volatility, low-correlation return profile independent of traditional equity and bond markets, while providing a monthly income distribution at an annualized rate of 6.00%. This is achieved through the combined performance of three differentiated and complementary sub-strategies: merger arbitrage, options writing, and structured credit. The merger arbitrage strategy was a consistent contributor throughout the year, generating positive returns in every quarter. Despite several deal breaks in larger transactions, the Fund avoided any material losses through prudent deal selection and active risk management. The Fund’s options writing strategy capitalized on the volatility risk premium (VRP) through systematic sales of cash-secured puts on the S&P 500. Despite some volatile periods in which the spread between implied and realized volatility was lower than its historic range, the strategy contributed positively to the overall return of the Fund as expected in a rising equity market. The structured credit component, which is made up of high-quality, short-duration CLO’s, was the Fund’s strongest performing strategy over the past year. The portfolio benefited from elevated floating-rate coupons, strong investor demand for CLO debt, and price appreciation from spread compression. We are pleased that each strategy not only contributed to the Fund meeting its return objectives, but also contributed to its diversification, supporting the Fund’s overall strategic goal.

As always, we thank you for your continued support and intend to work hard to maintain it. We truly appreciate your trust and confidence in First Trust Capital Management.

Fund Performance

The following graph and chart compare the initial and subsequent account values at the end of each of the most recently completed 10 fiscal years of the Fund, or for the life of the Fund, if shorter. It assumes a \$10,000 initial investment at the beginning of the first fiscal year in an appropriate, broad-based securities market index for the same period.

GROWTH OF \$10,000

AVERAGE ANNUAL TOTAL RETURN	1 Year	5 Years	10 Years
First Trust Multi-Strategy Fund (Class C/FTMCX) ^{1,2}	3.68%	6.39%	3.01%
First Trust Multi-Strategy Fund (Class C/FTMCX)—excluding sales load ¹	4.66%	6.39%	3.01%
Bloomberg U.S. Aggregate Bond Index	4.88%	-0.40%	1.46%
Blended Benchmark Index (50% S&P 500 Index/50% Bloomberg U.S. Aggregate Bond Index) ³	6.68%	8.97%	7.12%
ICE BofA Merrill Lynch 3-Month US Treasury Bill Index ³	5.00%	2.57%	1.88%

¹Class C commenced operations on November 14, 2022. The performance figures for Class C shares include the performance for the Class I shares for the periods prior to the inception date of Class C shares, adjusted for the difference in Class C shares and Class I shares expenses. Class C shares impose higher expenses than Class I shares.

²A contingent deferred sales charge of 1.00% may be imposed on any redemptions of shares within 12 months of the date of purchase.

³Effective July 1, 2024, the Fund replaced the ICE BofA Merrill Lynch 3 Month US Treasury Bill Index as the Fund's primary performance benchmark with the Bloomberg U.S. Aggregate Bond Index in order to satisfy a change in regulatory requirements. The Fund also introduced a new secondary performance benchmark, the 50% S&P 500 Index/50% Bloomberg U.S. Aggregate Bond Index. First Trust Capital Management L.P., the Fund's Advisor, believes the 50% S&P 500 Index/50% Bloomberg U.S. Aggregate Bond Index is an appropriate benchmark for the strategy employed by the Fund, provides similar information to the prior benchmark index, and delivers better value to shareholders.

Keep in mind that the Fund's past performance is not a good predictor of how the Fund will perform in the future.

The graph and table do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or redemption of Fund shares.
