Note 1 — Organization

FT Vest Hedged Equity Income Fund: Series B1 (the "Fund") is a Delaware statutory trust registered under the Investment Company Act of 1940, as amended (the "Investment Company Act"), as a diversified, closed-end management investment company. The Fund operates under an Agreement and Declaration of Trust dated November 7, 2024 (the "Declaration of Trust"). First Trust Capital Management L.P. (the "Investment Adviser") serves as the investment adviser of the Fund. Vest Financial LLC serves as sub-adviser to the Fund (the "Sub-Adviser" and together with the Investment Adviser, the "Advisers"). Each of the Advisers is an investment adviser registered with the Securities and Exchange Commission (the "SEC") under the Investment Advisers Act of 1940, as amended. The Fund has elected to be treated as a regulated investment company (a "RIC") under the Internal Revenue Code of 1986, as amended (the "Code"). The Fund currently offers shares of beneficial interest (the "Shares") in Class A Shares and Class I Shares. Only Class I Shares have been issued as of the date of this report.

The Fund's investment objective is to achieve attractive risk-adjusted returns through a combination of high level of current income and potential (although limited) long-term capital appreciation, while attempting to mitigate the risk of loss of principal. In seeking to achieve this investment objective, the Fund intends to pursue a hedged equity investment strategy by (i) investing primarily in U.S. exchange-traded equity securities contained in the S&P 500® Index (such index, the "Reference Index"), (ii) mitigating some of the risk of loss of principal by purchasing a hedge against the long term decline of the Reference Index ("Downside Hedge") during the Designated Period (defined below), and (iii) producing income with a target net income objective of 12.0% on an annual basis. The Downside Hedge is designed to mitigate the risk of loss for those investors that buy Shares at the beginning of a three-year period (the "Designated Period") and hold Shares until the end of the Designated Period. The Fund does not seek to provide a specific level of protection or any specific level of capital appreciation or total return performance compared to the total return performance of the Reference Index.

The Fund is an investment company and accordingly follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board ("FASB") Accounting Standard Codification Topic 946 "Financial Services — Investment Companies."

Note 2 — Accounting Policies

The following is a summary of the significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The preparation of financial statements in conformity with the generally accepted accounting principles in the United States of America ("GAAP") requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from these estimates.

(a) Valuation of Investments

UMB Fund Services, Inc., the Fund's Administrator, calculates the Fund's net asset value ("NAV") as of the close of business on the last day of each month and at such other times as the Board of Trustees (the "Board") may determine, including in connection with repurchases of Shares, in accordance with the procedures described below or as may be determined from time to time in accordance with policies established by the Board.

For purposes of calculating NAV, portfolio securities and other assets for which market quotations are readily available are valued at market value. A market quotation is readily available only when that quotation is a quoted price (unadjusted) in active markets for identical investments that the Fund can access at the measurement date, provided that a quotation will not be readily available if it is not reliable.

Investments for which market quotations are not readily available are valued at fair value as determined in good faith pursuant to Rule 2a-5 under the Investment Company Act. As a general principle, the fair value of a security or other asset is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Pursuant to Rule 2a-5, the Board has designated the Investment Adviser as the valuation designee ("Valuation Designee") for the Fund to perform in good faith the fair value determination relating to all Fund investments, under the Board's oversight. The Investment Adviser carries out its designated responsibilities as Valuation Designee through its Valuation Committee. The fair values of one or more assets may not be the prices at which those assets are ultimately sold and the differences may be significant.

The Valuation Designee may value put and call options by taking the mid price between the bid and ask price. Certain exchange-traded options, such as Flexible Exchange[®] Options ("FLEX Options"), are typically valued using a model-based price provided by a third-party pricing service provider.

The Valuation Designee may value Fund portfolio securities for which market quotations are not readily available and other Fund assets utilizing inputs from pricing services, quotation reporting systems, valuation agents and other third-party sources.

Assets and liabilities initially expressed in foreign currencies will be converted into U.S. dollars using foreign exchange rates provided by a pricing service. Trading in foreign securities generally is completed, and the values of such securities are determined, prior to the close of securities markets in the United States. Foreign exchange rates are also determined prior to such close. On occasion, the values of securities and exchange rates may be affected by events occurring between the time as of which determination of such values or exchange rates are made and the time as of which the NAV of the Fund is determined. When such events materially affect the values of securities held by the Fund or its liabilities, such securities and liabilities will be valued at fair value as determined in good faith by the Valuation Designee.

(b) Options

The Fund writes and purchases options contracts. The Fund intends to trade FLEX Options. FLEX Options are customized equity or index option contracts that trade on an exchange, but provide investors with the ability to customize key contract terms like exercise prices, styles and expiration dates. FLEX Options are required to be centrally cleared. When the Fund writes or purchases an option, an amount equal to the premium received or paid by the Fund is recorded as an asset or a liability and is subsequently adjusted to the current market value of the option written or purchased. Premiums received or paid from writing or purchasing options that expire unexercised are treated by the Fund on the expiration date as realized gains or losses. The difference between the premium and the amount paid or received on effecting a closing purchase or sale transaction, including brokerage commissions, is also treated as a realized gain or loss. If an option is exercised, the premium paid or received is added to the cost of the purchase or proceeds from the sale in determining whether the Fund has realized a gain or a loss on investment transactions. The Fund, as a writer of an option, may have no control over whether the underlying securities may be sold (call) or purchased (put) and as a result bears the market risk of an unfavorable change in the price of the security underlying the written option.

(c) Investment Transactions, Investment Income and Expenses

Investment transactions are accounted for on the trade date. Realized gains and losses on investments are determined on the identified cost basis. Dividend income and expense is recorded net of applicable withholding taxes on the ex-dividend date and interest income and expense, including where applicable, accretion of discount and amortization of premium on investments, is recorded on an accrual basis.

(d) Federal Income Taxes

The Fund intends to comply with the requirements of Subchapter M of the Code applicable to regulated investment companies and to distribute substantially all of its net investment income and any net realized gains to its shareholders (collectively, "Shareholders"). Therefore, no provision is made for federal income or excise taxes. Due to the timing of dividend distributions and the differences in accounting for income and realized gains and losses for financial statement and federal income tax purposes, the fiscal year in which amounts are distributed may differ from the year in which the income and realized gains and losses are recorded by the Fund. For financial reporting purposes, dividends and distributions to Shareholders are recorded on the ex-date.

ASC 740 — Accounting for Uncertainty in Income Taxes (the "Income Tax Statement") requires an evaluation of tax positions taken (or expected to be taken) in the course of preparing a Fund's tax returns to determine whether these positions meet a "more-likely-than-not" standard that, based on the technical merits, have a more than fifty percent likelihood of being sustained by a taxing authority upon examination. A tax position that meets the "more-likely-than-not" recognition threshold is measured to determine the amount of benefit to recognize in the financial statements. The Fund recognizes interest and penalties, if any, related to unrecognized tax benefits as income tax expense in the Statement of Operations.

The Income Tax Statement requires management of the Fund to analyze tax positions taken in the prior three open tax years, if any, and tax positions expected to be taken in the Fund's current tax year, as defined by the Internal Revenue Service statute of limitations for all major jurisdictions, including federal tax authorities and certain state tax authorities. As of June 30, 2025, the Fund did not have a liability for any unrecognized tax benefits. The Fund has no examination in progress and is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

(e) Distributions to Shareholders

The Fund makes monthly distributions to its Shareholders equal to 12% annually of the Fund's net asset value per Share (the "Distribution Policy"). This predetermined dividend rate may be modified by the Board from time to time and may be increased to the extent of the Fund's investment company taxable income that it is required to distribute in order to maintain its status as a RIC. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from GAAP. The character of distributions made during the year from net investment income or net realized gains may differ from the characterization for federal income tax purposes due to differences in the recognition of income expense and gain (loss) items for financial statement and tax purposes.

For financial reporting purposes, dividends and distributions to Shareholders are recorded on the ex-date. If, for any distribution, available cash is less than the amount of this predetermined dividend rate, then assets of the Fund will be sold, and such disposition may generate additional taxable income. The Fund's final distribution for each calendar year will include any remaining investment company taxable income and net tax-exempt income (if any) undistributed during the year, as well as the remaining net capital gain realized during the year. If the total distributions made in any calendar year exceed investment company taxable income, net tax-exempt interest income (if any) and net capital gain, such excess distributed amount would be treated as ordinary dividend income to the extent of the Fund's current and accumulated earnings and profits. Payments in excess of the earnings and profits would first be a tax-free return of capital to the extent of the adjusted tax basis in the Shares. After such adjusted tax basis is reduced to zero, the payment would constitute capital gain (assuming the Shares are held as capital assets). This Distribution Policy may, under certain circumstances, have certain adverse consequences to the Fund and its Shareholders because it may

result in a return of capital resulting in less of a Shareholder's assets being invested in the Fund and, over time, increase the Fund's expense ratio. The Distribution Policy also may cause the Fund to sell a security at a time it would not otherwise do so in order to manage the distribution of income and gain.

(f) Organizational and Offering Costs

Organizational costs consist of the costs of forming the Fund, drafting of bylaws, administration, custody and transfer agency agreements and legal services in connection with the initial meeting of the Board. Offering costs consist of the costs of preparation, review and filing with the SEC the Fund's registration statement, the costs of preparation, review and filing of any associated marketing or similar materials, the costs associated with the printing, mailing or other distribution of the Private Placement Memorandum, Statement of Additional Information and/or marketing materials, and the amounts of associated filing fees and legal fees associated with the offering. The aggregate amount of the organizational costs and offering costs reflected in the Statement of Operations are \$10,260 and \$37, respectively.

Organizational costs are expensed as they are incurred. Offering costs are amortized to expense over twelve months on a straight-line basis.

(g) Segments

In this reporting period, the Fund adopted FASB Accounting Standards Update 2023-07, Segment Reporting (Topic 280) — Improvements to Reportable Segment Disclosures ("ASU 2023-07"). Adoption of the new standard impacted financial statement disclosures only and did not affect the Fund's financial position or the results of its operations. An operating segment is defined in Topic 280 as a component of a public entity that engages in business activities from which it may recognize revenues and incur expenses, has operating results that are regularly reviewed by the public entity's chief operating decision maker ("CODM") to make decisions about resources to be allocated to the segment and assess its performance, and has discrete financial information available. The Fund's President acts as the Fund's CODM. The Fund represents a single operating segment, as the CODM monitors the operating results of the Fund as a whole and the Fund's long-term strategic asset allocation is pre-determined in accordance with the terms of the Fund's single investment objective which is executed by the Fund's portfolio managers as a team. The financial information in the form of the Fund's portfolio composition, total returns, expense ratios and changes in net assets, which are used by the CODM to assess the segment's performance versus the Fund's comparative benchmarks and to make resource allocation decisions for the Fund's single segment, is consistent with that presented within the Fund's financial statements. The total return and performance of each Fund is reflected within the accompanying Financial Highlights. Segment assets are reflected on the accompanying Statement of Assets and Liabilities as "total assets" and significant segment expenses are listed on the accompanying Statement of Operations.

Note 3 — Investment Advisory and Other Agreements and Affiliates

The Fund pays the Investment Adviser a unitary management fee (the "Unitary Management Fee") in consideration of the advisory services provided by the Investment Adviser to the Fund. In turn, the Investment Adviser will pay substantially all operating expenses of the Fund, excluding the Unitary Management Fee, initial and ongoing offering expenses, organizational expenses, interest expenses, taxes, portfolio transaction-related fees and expenses, costs of borrowing, distribution and service fees payable pursuant to a Rule 12b-1 plan, litigation and indemnification expenses, and any other extraordinary expenses not incurred in the ordinary course of the Fund's business. The Fund pays the Unitary Management Fee at an annual rate of 2.65%, payable monthly in arrears, based upon the Fund's net assets as of each month-end. The Unitary Management Fee is paid to the Investment Adviser before giving effect to any repurchase of Shares in the Fund effective as of that date and will decrease the net profits or increase the net losses of the Fund.

The Investment Adviser pays the Sub-Adviser a management fee (the "Sub-Advisory Fee") in consideration of the advisory services provided by the Sub-Adviser to the Fund. The Sub-Adviser's fees are paid by the Investment Adviser out of the Unitary Management Fee. The Sub-Adviser receives a Sub-Advisory Fee equal to 50% of the monthly Unitary Management Fee paid to the Investment Adviser, which shall be reduced as follows. The Sub-Adviser has agreed with the Investment Adviser that it will pay one-half of all operating expenses of the Fund, excluding the Unitary Management Fee, initial and ongoing offering expenses and organizational expenses, interest expenses, taxes, portfolio transaction-related fees and expenses, costs of borrowing, distribution and service fees payable pursuant to a Rule 12b-1 plan, and litigation and indemnification expenses and any other extraordinary expenses not incurred in the ordinary course of the Fund's business. The sub-advisory fees shall be reduced by the Sub-Adviser's share of such expenses, and in the event the Sub-Adviser's share of the expenses exceeds the amount of the Sub-Advisory Fee in any month, the Sub-Adviser will pay the difference to the Investment Adviser.

First Trust Portfolios L.P., an affiliate of both the Investment Adviser and the Sub-Adviser, currently serves as the Fund's placement agent. UMB Fund Services, Inc. ("UMBFS") serves as the Fund's fund accountant, transfer agent and administrator; and UMB Bank, N.A., an affiliate of UMBFS, serves as a custodian of the assets of the Fund.

A trustee and certain officers of the Fund are employees of UMBFS. The Fund does not compensate trustees and officers affiliated with UMBFS.

Vigilant Compliance, LLC provides Chief Compliance Officer ("CCO") services to the Fund.

Note 4 — Federal Income Taxes

The Fund has elected to be treated and intends to qualify as a RIC for federal income tax purposes. As a RIC, the Fund will generally not be subject to federal corporate income tax, provided that when it is a RIC, it distributes substantially all of its income and gains each year.

At June 30, 2025, gross unrealized appreciation and depreciation of investments owned by the Fund, based on cost for federal income tax purposes, were as follows:

Cost of investments	\$42,771,719
Gross unrealized appreciation	\$ 4,163,410
Gross unrealized depreciation	(4,657,075)
Net unrealized appreciation (depreciation) on investments	\$ (493,665)

The difference between cost amounts for financial statement and federal income tax purposes is due primarily to timing differences in recognizing certain gains and losses in securities transactions.

Note 5 — Investment Transactions

For the period ended June 30, 2025, purchases and sales of investments, excluding short-term investments, were \$90,170,514 and \$50,834,303, respectively.

Note 6 — Indemnifications

In the normal course of business, the Fund enters into contracts that contain a variety of representations, which provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund that have not yet occurred. However, the Fund expects the risk of loss to be remote.

Note 7 — Repurchase of Shares

At the discretion of the Board and provided that it is in the best interests of the Fund and Shareholders to do so, the Fund provides a limited degree of liquidity to the Shareholders by conducting tender

offers at least annually every twelfth month after the closing of a Designated Period, as of a Friday (other than the 3rd Friday of the month). In each tender offer, the Fund may offer to repurchase its Shares at their NAV as determined as of the relevant valuation date. Each tender offer in the first year and second year of a Designated Period ordinarily will be limited to the repurchase of an amount up to 10% of the Shares outstanding, but if the number of Shares tendered for repurchase exceeds the number the Fund intended to repurchase, the Fund may determine to repurchase less than the full number of Shares tendered. In such event, Shareholders will have their Shares repurchased on a pro rata basis, and tendering Shareholders will not have all of their tendered Shares repurchased by the Fund. In the third year of each Designated Period, subject to the Board's discretion, each tender offer that coincides with the expiration of the Designated Period shall be for up to 100% of the Shares outstanding. Shareholders who tender their Shares prior to the end of the Designated Period will not fully benefit from the Downside Hedge, which is designed to be achieved at the end of the specified Designated Period. A 2.00% repurchase fee will be charged by the Fund with respect to any repurchase of Shares from a Shareholder in the first year of each Designated Period. Repurchases will be made at such times and on such terms as may be determined by the Board, in its sole discretion. However, no assurance can be given that repurchases will occur or that any Shares properly tendered will be repurchased by the Fund. The Fund may choose not to conduct a tender offer or may choose to conduct a tender offer for less than 10% (or 100% as applicable) of its outstanding Shares. Investors may not have access to the money invested in the Fund for an indefinite time. No share repurchases occurred during the period ended June 30, 2025.

Note 8 — Fair Value Measurements and Disclosure

ASC 820 — Fair Value Measurements defines fair value, establishes a framework for measuring fair value in accordance with GAAP, and expands disclosure about fair value measurements. It also provides guidance on determining when there has been a significant decrease in the volume and level of activity for an asset or a liability, when a transaction is not orderly, and how that information must be incorporated into a fair value measurement.

Under *Fair Value Measurements*, various inputs are used in determining the value of the Fund's investments. These inputs are summarized into three broad levels as described below:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access.
- Level 2 Observable inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates and similar data.
- Level 3 Unobservable inputs for the asset or liability, to the extent relevant observable inputs
 are not available, representing the Fund's own assumptions about the assumptions a market
 participant would use in valuing the asset or liability, and would be based on the best information
 available.

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, whether the security is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3.

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement.

The inputs or methodology used for valuing securities are not an indication of the risk associated with investing in those securities. The following table summarizes the Fund's investments that are measured at fair value by level within the fair value hierarchy as of June 30, 2025:

	Level 1	Level 2	Level 3**	Total
Assets				
Investments				
Common Stocks*	\$42,319,865	\$ —	\$ —	\$42,319,865
Short-Term Investments	1,243,827	_	_	1,243,827
Total Investments	43,563,692	_		43,563,692
Purchased Options Contracts	_	7,715,943	_	7,715,943
Total Investments and Options	\$43,563,692	\$7,715,943	\$ —	\$51,279,635
Liabilities				
Written Options Contracts	\$ 182,672	\$8,818,909	\$ —	\$ 9,001,581
Total Written Options Contracts	\$ 182,672	\$8,818,909	<u> </u>	\$ 9,001,581

^{*} All common stocks held in the Fund are Level 1 securities. For a detailed break-out of common stocks by major industry classification, please refer to the Schedule of Investments.

Note 9 — Derivatives and Hedging Disclosures

ASC 815 — Derivatives and Hedging requires enhanced disclosures about the Fund's derivative and hedging activities, including how such activities are accounted for and their effects on the Fund's financial position, performance and cash flows.

The effects of these derivative instruments on the Fund's financial position and financial performance as reflected in the Statement of Assets and Liabilities and Statement of Operations are presented in the tables below. The fair values of derivative instruments as of June 30, 2025 by risk category are as follows:

	Asset Derivatives		Liability Derivatives	
Derivatives not designated as hedging instruments	Statement of Asset and Liabilities Location	Value	Statement of Asset and Liabilities Location	Value
Equity contracts	Purchased options contracts, at value	\$7,715,943	Written options contracts, at value	\$9,001,581

The effects of derivative instruments on the Statement of Operations for the period ended June 30, 2025, are as follows:

Derivatives not designated as hedging instruments	Purchased Options Contracts	Written Options Contracts
Equity contracts	\$48,311	\$377,779
Change in Unrealized Appreciation/Depreciation on Derivative	es Recognized in Inco	me
Change in Unrealized Appreciation/Depreciation on Derivative Derivatives not designated as hedging instruments	es Recognized in Inco Purchased Options Contracts	me Written Options Contract:

^{**} The Fund did not hold any Level 3 securities at period end.

The number of contracts is included on the Schedule of Investments. The quarterly average volumes of derivative instruments as of June 30, 2025, are as follows:

Derivative	Quarterly Average	Amount
Options Contracts – Purchased	Average Notional Value	\$ 82,129,068
Options Contracts – Written	Average Notional Value	(54,803,525)

Note 10 — Risk Factors

An investment in the Fund involves various risks. The Fund invests in and actively trades equity securities and other financial instruments using a variety of strategies and investment techniques with significant risk characteristics, including the risks arising from the volatility of the equity securities. No guarantee or representation is made that the investment program will be successful. Certain local, regional or global events such as war, acts of terrorism, the spread of infectious illnesses and/or other public health issues, financial institution instability or other events may have a significant impact on a security or instrument. These types of events and other like them are collectively referred to as "Market Disruptions and Geopolitical Risks" and they may have adverse impacts on the worldwide economy, as well as the economies of individual countries, the financial health of individual companies and the market in general in significant and unforeseen ways. Some of the impacts noted in recent times include but are not limited to embargos, trade policies and tariffs, political actions, supply chain disruptions, bank failures, restrictions to investment and/or monetary movement including the forced selling of securities or the inability to participate in impacted markets. The duration of these events could adversely affect the Fund's performance, the performance of the securities in which the Fund invests and may lead to losses on your investment. The ultimate impact of "Market Disruptions and Geopolitical Risks" on the financial performance of the Fund's investments is not reasonably estimable at this time. Management is actively monitoring these events.

Sector Risk — As of June 30, 2025, a significant portion of the Reference Index is comprised of companies in the information technology sector, although this may change from time to time. This information technology sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development, and government regulation. The Fund will not be concentrated in a particular industry or group of industries within this sector. To the extent that the Fund invests a significant percentage of its assets in a sector, an adverse economic, business or political development may affect the value of the Fund's investments more than if the Fund were more broadly diversified. A significant exposure makes the Fund more susceptible to any single occurrence and may subject the Fund to greater market risk than a fund that is more broadly diversified.

Options Risk — An option is a contract that gives the purchaser (holder) of the option, in return for a premium, the right to buy from (call) or sell to (put) the seller (writer) of the option the security or currency underlying the option at a specified exercise price at any time during the term of the option (normally not exceeding nine months). The writer of an option has the obligation upon exercise of the option to deliver the underlying security or currency upon payment of the exercise price or to pay the exercise price upon delivery of the underlying security or currency. The use of options involves investment strategies and risks different from those associated with ordinary portfolio securities transactions. The prices of options are influenced by, among other things, actual and anticipated changes in the value of the underlying instrument, or in interest or currency exchange rates, including the anticipated volatility, which in turn are affected by fiscal and monetary policies and by national and international political and economic events. As a seller (writer) of a put option, the seller will tend to lose money if the value of the reference index or security falls below the strike price. As the seller (writer) of a call option, the seller will tend to lose money if the value of the reference index or security rises above the strike price. As the buyer of a put or call option, the buyer risks losing the entire premium invested in the option if the buyer does not exercise the option. The effective use of options

also depends on the Fund's ability to terminate option positions at times deemed desirable to do so. There is no assurance that the Fund will be able to effect closing transactions at any particular time or at an acceptable price. In addition, there may at times be an imperfect correlation between the movement in values of options and their underlying securities and there may at times not be a liquid secondary market for certain options. There may be times the Fund needs to sell securities in order to settle an option position, which could result in the distribution of premium from that option position being classified as a return of capital and make the Fund less tax-efficient. Options may also involve the use of leverage, which could result in greater price volatility than other securities.

Note 11 — Events Subsequent to the Fiscal Period End

In preparing these financial statements, management has evaluated subsequent events through the date of issuance of the financial statements included herein. The Board authorized a special, one-time tender for the Fund to offer to repurchase Shares from shareholders in an amount up to 50.00% of the net assets of the Fund with a July 21, 2025 repurchase pricing date. Shareholders that desired to tender Shares for repurchase were required to do so by July 15, 2025. The total amount of tendered Shares was \$4,718,680 for this repurchase offer. There have been no other subsequent events that occurred during such period that would require disclosure or would be required to be recognized in the financial statements.

Approval of the Investment Management Agreement and Sub-Advisory Agreement

At a meeting of the Board of Trustees (the "Board" and the members thereof, "Trustees") held on December 4, 2025 and December 5, 2025 (the "Meeting"), the Board, including a majority of Trustees who are not "interested persons" within the meaning of Section 2(a)(19) of the Investment Company Act of 1940, as amended (the "Independent Trustees"), approved the investment management agreement (the "Investment Management Agreement") between First Trust Capital Management L.P. (the "Investment Adviser") and FT Vest Hedged Equity Income Fund: Series B1 (the "Fund") and the Fund's sub-advisory agreement among the Investment Adviser, the Fund and Vest Financial LLC, an affiliate of the Investment Adviser and the Fund's investment sub-adviser (the "Sub-Adviser" and, together with the Investment Adviser, the "Advisers") (the "Sub-Advisory Agreement" and, together with the Investment Management Agreement, the "Advisory Agreements").

In advance of the Meeting, the Board requested and received materials from the Advisers to assist them in considering the approval of the Advisory Agreements. Among other things, the Board reviewed reports from third parties and management about the below factors. The Board did not consider any single factor as controlling in determining whether or not to approve the Advisory Agreements. Nor are the items described herein all-encompassing of the matters considered by the Board.

The Board engaged in a detailed discussion of the materials with management of the Investment Adviser. The Independent Trustees then met separately with independent counsel to the Independent Trustees at the Meeting for a full review of the materials. Following these sessions, the full Board reconvened and after further discussion determined that the information presented provided a sufficient basis upon which to approve the Advisory Agreements.

NATURE, EXTENT AND QUALITY OF SERVICES

The Board reviewed and considered the nature, extent and quality of the investment advisory services proposed to be provided by the Advisers to the Fund under the Advisory Agreements, including the Sub-Adviser's selection of Fund investments. The Board also reviewed and considered the nature and extent of the non-advisory, administrative services to be provided by the Advisers to the Fund, including, among other things providing office facilities, equipment and personnel. The Board also reviewed and considered the qualifications of the portfolio managers and other key personnel who would provide the investment advisory services and/or administrative services to the Fund. The Board determined that such portfolio managers and key personnel are well-qualified by education and/or training and experience to perform the services for the Fund in an efficient and professional manner. The Board also took into account the Advisers' compliance policies and procedures, including those used by the Investment Adviser to determine the value of the Fund's investments. Based on their review, the Board concluded that the nature, extent and quality of services expected to be provided to the Fund under the Advisory Agreements was satisfactory.

PERFORMANCE

The Board considered the investment experience of the Advisers. The Board noted that the Investment Adviser manages other funds that have similar options-writing strategies, and that the Sub-Adviser acts as the investment sub-adviser to recently launched investment products managed by the Investment Adviser that have similar investment objectives and strategies as the Fund. However, because the Fund had not yet commenced operations, the Board was not able to consider Fund performance.

FEES AND EXPENSES

The Board reviewed the proposed unitary management fee rate (the "Unitary Fee"), the proposed subadvisory fee and estimated total expense ratio of the Fund, noting that the Investment Adviser pays the Sub-Adviser from the Unitary Fee. The Board compared the Unitary Fee and pro-forma total

expense ratio for the Fund with various comparative data, including a report of other comparable funds prepared by an independent third party. The Board noted that the Fund's proposed Unitary Fee and estimated expenses were comparable to the net fees and expenses of other comparable peer funds and other funds managed by the Investment Adviser. In addition, the Board noted that the Investment Adviser has agreed to pay substantially all operating expenses of the Fund, excluding the Unitary Fee, initial and ongoing offering expenses and organizational expenses, interest expenses, taxes, portfolio transaction-related fees and expenses, costs of borrowing, distribution and service fees payable pursuant to a Rule 12b-1 plan, and litigation and indemnification expenses and any other extraordinary expenses not incurred in the ordinary course of the Fund's business, with the Sub-Adviser covering half of such expenses pursuant to the Sub-Advisory Agreement (the "Covered Operational Expenses"). The Board concluded that the proposed Unitary Fee to be paid by the Fund, the sub-advisory fee payable to the Sub-Adviser and the pro forma total expense ratio were reasonable and satisfactory in light of the services to be provided.

BREAKPOINTS AND ECONOMIES OF SCALE

The Board reviewed the structure of the Unitary Fee under the Investment Management Agreement and the sub-advisory fee to be paid by the Investment Adviser to the Sub-Adviser under the Sub-Advisory Agreement, neither of which included breakpoints. The Board noted that because the Fund's assets were expected to remain relatively consistent over the initial three-year period following the initial close of subscriptions in the Fund, during which the Fund would be closed to new investors (the "Designated Period"), the Fund would not benefit from economies of scale during the Designated Period and accordingly it was reasonable for the Unitary Fee to not include breakpoints. The Board considered the Covered Operational Expenses proposed to be paid by the Investment Adviser, and the Board concluded that the advisory fees were reasonable for the services to be provided.

PROFITABILITY OF INVESTMENT ADVISER AND SUB-ADVISER

The Board considered and reviewed pro-forma information concerning the estimated costs to be incurred, including the Covered Operational Expenses, and profits expected to be realized by the Advisers from their relationship with the Fund. Although the Board considered and reviewed pro-forma information concerning the Advisers' expected profits, due to the fact that operations for the Fund had not yet commenced, the Board made no determination with respect to profitability.

ANCILLARY BENEFITS AND OTHER FACTORS

The Board also discussed other benefits to be received by the Investment Adviser from its management of the Fund including, without limitation, reputational benefits and the ability to market other investment products offered by the Investment Adviser. The Board noted that (i) the Fund's placement agent is an affiliate of the Investment Adviser and receives certain compensation in its role as placement agent and for other services related to the Fund, which are paid by the Investment Adviser;; and (ii) an affiliate of the Investment Adviser receives management fees for assets held in the Fund by such affiliate's wealth management clients for services and resources provided by the affiliate to its clients. The Board noted that the Sub-Adviser did not anticipate receiving any ancillary benefits resulting from its association with the Fund, other than potential opportunities to obtain securities trading advantages for its other advisory clients and that the Advisers do not have affiliations with the Fund's transfer agent, administrator or custodian, and therefore would not derive any benefits from the relationships these parties may have with the Fund. The Board concluded that the Unitary Fee and sub-advisory fee were reasonable in light of the fall-out benefits.

GENERAL CONCLUSION

Based on its consideration of all factors that it deemed material, and assisted by the advice of its counsel, the Board concluded it would be in the best interest of the Fund and its shareholders to approve the Advisory Agreements, each for an initial two-year term.

FT Vest Hedged Equity Income Fund: Series B1 FUND INFORMATION — Continued June 30, 2025 (Unaudited)

Availability of Quarterly Portfolio Schedules

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Part F of Form N-PORT. The Fund's Form N-PORT is available on the SEC website at www.sec.gov or without charge and upon request by calling the Fund at (877) 779-1999.
